

Field Labels

Field labels are headings that label the dimension members in a table. For example, if you have a column that contains rows for different product categories such as Appliances, Bookcases, etc., you can turn on a field label to show that these rows are members of the Product Category field. By default, field labels are shown but you can choose to hide them.

1 Show / Hide Field Labels

Select **Table > Field Labels for Columns** or **Field Labels for Rows**.

Field labels are headings that indicate the data fields that are shown in the table.

	2001	2002	2003	2004	Grand Total
APPLIANCES	52,220	18,348	24,961	35,350	130,879

Grand Total	1,466,278	676,781	655,284	634,227	3,432,570

2 Format Field Labels

Right-click a field label in the view and select **Format**. In the **Format** window you can specify fonts, shading, and more.

Format fonts, alignment, shading, and even how adjacent labels are separated.
