

## Understanding the differences between Viewer and Interactor

It is important to understand the differences between the two license models. Below is a diagram that shows the basic permissions.

These are the default licensing levels. Using the permission setting on Tableau Server or while publishing, you can remove permissions. However, you cannot add permissions.

It is important to note that if your data has quick filters, only users with Interactor license can view or change the quick filter. This also applies to any URL filters.

Feature	Role	
	Viewer	Interactor
Add/View Comments and Tags	✓	✓
Create PDF	✓	✓
Export (Visible Summarized) Cross-tab	✓	✓
Export (Visible Summarized) Data	✓	✓
Export Image	✓	✓
Open Hyperlink to External System	✓	✓
Refresh Data from Data Source	✓	✓
Select Marks and view Tooltips	✓	✓
Use Color Legend Highlighter Tool	✓	✓
Keep/Exclude Values	✗	✓
